End Tidal Carbon Dioxide Monitoring

EDAN G2 CO₂ (sidestream)

Superior water trap design for accurate monitoring

iCARBTM algorithm with intelligent CO₂ pseudo wave identification technology

Multiple sampling accessories as options

Respironics CO₂ (mainstream/sidestream)

Plug & play module design

Dehumidification tube instead of water trap

Low sampling rate of 50ml/min

MASIMO Anesthetic Gas/O₂ (Mainstream/Sidestream)

Unique plug & play module for mainstream anesthetic gas monitoring

The no moisture sampling line design suitable for all clinical application

A stable low flow of 50ml/min

Multiple Display Modes
